

Exmoor (C993)

ToddleBox connectors ensure security, stability, and easy reconfiguration.

Smooth, rounded handholds aid in easy reconfiguration.

Give interest and texture to flat floor space with a ToddleBox stage set. The added dimension of a raised surface opens up more possibilities for toddlers' play.

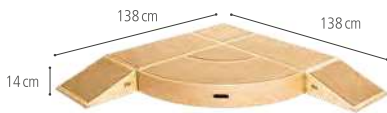

ToddleBox sets are versatile and modular, so staff can create playscapes that invite movement.

ToddleBox sets

ITERS 16: 7.3; 2: 7.1

Toddlers are constantly on the move. These sets create age-appropriate challenges for your energetic explorers. Arrange ToddleBoxes to create paths and steps, or flip them over for children to climb in.

Open-ended playthings build creativity in young children. The versatility of our ToddleBoxes is a perfect example.

Right-way-up or upside down, these boxes create endless combinations for exploring.

Learning happens naturally as children negotiate crawling and climbing, up and down.

Children learn by moving. Repeated motions like climbing in and out of ToddleBoxes are opportunities to develop problem-solving and refine motor skills.

ToddleBoxes

ITERS 16: 7.3, 5.3, 5.4; 30: 7.2, 5.1, 5.3

ToddleBoxes offer endless possibilities for small-scale active play. Whether they are navigating winding pathways, stepping up and down, or climbing in and out, young children will develop important gross motor skills and muscles. Modular units let you select exactly what you want to fit your space, needs and budget. Start with a small configuration, and add to it over time.

Connectability

ToddleBoxes connect: Insert the connector through two handholds and turn to engage. Flip the units over to connect them. Each unit comes with one connector.

How do I put it all together?
