## Brown bear

Printed 2023-06-15

### Crawl up the sleeping bear's back and dash down

The free standing slide Brown Bear is designed for the age group 1-3 years, and is perfect for giving children a fun sliding experience both outside and inside, as the slide is also ideal for indoor use.

The slide has a floor height of 58 cm and a few steps to the top, from where the ride goes down the sliding surface made of low maintenance polyethylene. The durable material neither gets burning hot in the sun nor gives splinters, unlike, for example, a wooden slide.

In addition to being a fun slide, Brown Bear also has a cave, where children can hide or relax. A hiding place is very popular amongst children, as it gives them peace and quiet to talk and share secrets, just as it can inspire the children to lots of new games.

All activities around the sleeping bear also have developmental benefits for the children. Their gross motor skills and coordination are strengthened by climbing- and crawling movements, whilst the ride down the slide improves their balance and familiarizes them with gravity.

### Why choose LEDON Explore?

- Low-maintenance play equipment in natural colours.
- In particular, it challenges and stimulates children's social skills, motor skills and balance.
- The play systems come in a wide range of sizes and price classes to suit every need.
- A theme world that arouses children's natural interest in experiencing and exploring the world.
