

Learn to crawl, stand and walk

The Brum the Bee crawling bridge is designed for tots and toddlers who are learning to crawl, stand and walk. Brum the Bee is designed to give even the youngest children something to hold onto so that they can pull themselves up when practising how to keep their balance. The specially developed cubic grain floor provides a non-slip surface, so even the smallest feet stand firm. Brum the Bee's wings are made of transparent polycarbonate, enabling children to keep an eye on what's happening around them even at crawling height.

Indoor or outdoor EN1176-approved

The Brum the Bee crawling bridge is for indoor as well as outdoor use. Outside, it will provide hours of fun throughout the summer, after which it can be washed and brought inside during the winter months. Indoors, we recommend placing it on a carpet. Like the rest of the LEDON MiniPlay series, Brum the Bee is approved and certified in accordance with the European standard EN1176, which guarantees that MiniPlay complies with strict quality and safety requirements. Brum the Bee is made of LEDON's own polyethylene material. As a result, Brum the Bee requires very little maintenance. And when Brum the Bee comes to the end of its life, the material is 100% recyclable and can be used to make a new playground.

Why choose LEDON MiniPlay?

- The series has been specifically designed for children aged 0 to 4 years.
- Suitable for both outdoor and indoor use.
- Developed in collaboration with children and childcare
