

Hollow Nook
(M800)

Carpeted top with textured trim offers additional sensory stimuli.

Handholds become peepholes, allowing the child to observe the room from a secure place.

Each Nook comes with a removable curtain that attaches with Velcro.

Teachers can easily add or remove the Nest Nook accessory boards.

Nest Nook
(M801) with
Mirror Board
(M813)

The floor of the Nest Nook is gently contoured to promote proprioceptive awareness.

Place your Nook in a low-traffic area for a quiet retreat, or incorporate it into the story circle to include everyone. It's small and moveable, allowing you to explore different arrangements.

Nooks create an inclusive and supportive space within your room, enabling children to self-regulate while fostering connection and a sense of belonging.

Nooks

ECERS 3: 5.4, 5.2; 4: 5.1 ITERS 3: 7.4

Every child needs a space for retreat at times. The Hollow Nook and Nest Nook provide a positive sanctuary where children can calm down, collect their thoughts, and self-regulate when they feel overwhelmed.

Made of solid beech, the Nook offers a sturdy structure, allowing children to brace against the sides. With rounded, smooth edges and no loose parts, it is designed for safety and longevity. The enclosure reduces light, sound and distractions, and the elevated floor accentuates the perception of retreat.

Nooks are convenient for teachers too! The mesh curtain allows for easy supervision, and rounded handholds make it simple to relocate the Nook within the room. Carpet can be replaced if necessary.

For ages 2–6

Hollow Nook
