# Stilla Acoustic Wall Panel Sets: Nexa, Kaia & Lyra

The panels from this collection absorb approximately 85% of mid-frequencies (NRC  $\approx$  0.85 – noise reduction coefficient), effectively reducing conversational and ambient noise, creating a quieter and more comfortable environment.

Made of high-quality 12 mm thick PET plastic and available in 18 colors. For self-assembly using mounting tape or mounting adhesive (not included).

The product has been classified as class B-s1, d0 in accordance with the EN 13501-1:2018 standard based on fire reaction test results. They meet the high fire safety requirements for wall and ceiling coverings.

# Stilla Stone Wall & Ceiling Panels

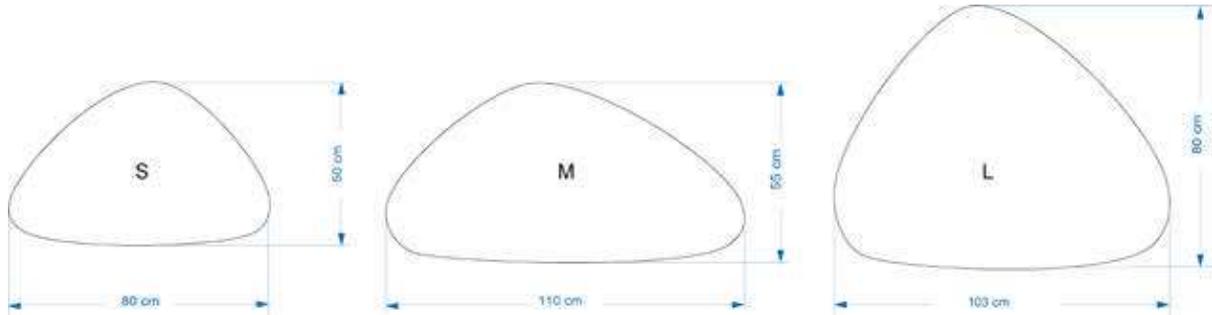

Felt panels are a modern solution for improving acoustic comfort in places such as schools, universities, open-plan spaces, conference rooms, and libraries. They are made of high-quality PET plastic.

Panels from this collection absorb around 85% of mid-range frequencies ( $NRC \approx 0.85$  – Noise Reduction Coefficient), which effectively reduces conversational noise and ambient sounds, creating a quieter and more comfortable environment. As a result, they support children with sensory needs, difficulties in concentration, sound hypersensitivity or auditory processing disorders, helping them to focus and feel safe.

Wall mounting is a simple way to improve acoustics in both smaller and larger rooms. The panels can be installed individually or combined into larger, decorative arrangements.

The product has been classified as fire reaction class B-s1, d0 in accordance with EN 13501-1:2018, based on fire reaction test results. It therefore meets high fire safety requirements for wall and ceiling coverings. The wide range of colours makes it possible to create unique visual compositions. Panel thickness: 12 mm. Dyed in the mass.
