

Forest Corner with sensory elements

An ideal place for creative play for your toddler. It stimulates the sense of sight and touch and develops eye-hand coordination. The corner is equipped with soft mattresses to keep your child safe. There are stairs on one side and a slide on the other. Along the way, many attractions are hidden in the form of fixed sensory elements. Under the slide there is an entrance – a foam tunnel. In addition, the corners contain sliding toys to stimulate the motor skills of the hands. The floor is covered with a non-slip carpet. Anchoring to the ground is necessary. It is advisable to protect the surface around the slide against falling (anti-slip mattresses: 101322PU-101327PU, 101337PU-101342PU, 101758PU, sold separately). Overall height – platform size 110 x 110 cm – platform height 59 cm – slide length 135 cm – stair length 120 cm. The stairs and slide can be installed interchangeably, depending on your preference.

SENSORY ELEMENTS

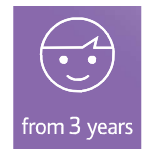

GEARS

Leo play corner

Made of 18 mm thick lacquered plywood, colorful MDF board, laminated board, and wood. It includes, among others, a slide, stairs, balcony, windows and mattresses. The platforms are covered with non-slip flooring. The platform near the slide features a "window" that allows looking into the lower level of the play corner. There are several entrances leading to this part under the platforms, and the floor is padded with mattresses. Anchoring to the floor is required. It is recommended to secure the area around the slide to prevent falls (anti-slip mattresses: 101322PU-101327PU, 101337PU-101342PU, 101758PU, sold separately).

COMPLIANT with standards EN 1176-1, EN 1176-3.

Leo play corner

A large play corner equipped with many attractions that intrigue children and provide great fun at the same time. They can slide, use manipulative panels, play in the kitchen corner (099162) or hide inside and play on soft mattresses.

ModuPlay

modular play corner

The ModuPlay modular play corner let you create and expand an indoor activity zone for children. The system consists of platforms as well as play and wall elements that can be freely combined—from a small crawling corner to a larger structure for climbing, sliding, movement play, and sensory activities. The structure is made of lacquered birch plywood, with posts made of solid alder wood. The platforms feature non-slip Tretford carpet covering, the slide has a scratch-resistant HPL surface, and the windows are made of acrylic. Various sensory and motor-skill modules are also available. The system can be set up as freestanding, however wall installation is recommended. Depending on the selected configuration, ensure sufficient space and a safe impact-absorbing zone at the end of the slide (mats sold separately). The structure must be secured to the floor or attached to the wall with mounting tape—instructions and mounting accessories are included. A water-based acrylic lacquer is used; with intensive use, natural signs of wear may appear. Do not use alcohol-based cleaners or strong disinfectants for maintenance.
