Thermoplastic Playground markings

TURN THE SCHOOLYARD OR SIDEWALK INTO A COLORFUL WORLD OF GAMES

WHAT IS STREETMARK COLORED THERMOPLASTIC PLAYGROUND MARKING?

It is a preformed thermoplastic that offers endless possibilities for color marking and finishing outdoor asphalt surfaces, roads, and sidewalks.

Thermoplastic playground markings are applied to asphalt or concrete surfaces in a heated state and, after cooling, create a highly durable, non-slip surface with a wide range of graphic options suitable for playgrounds, traffic and other markings.

Unlike paints and coatings, which wear off quickly, thermoplastic material will look good and remain functional for many years. The material is non-toxic.

- **Safe for children – EN 71-3 and PAH compliant.**
- **Lasts up to 10 times longer than paint.**
- **Colorful and highly resistant to UV radiation.**
- **Available in multiple colors.**
- **Easy to shape – almost any logo, decal or inscription can be created.**

Discover our wide range of thermoplastic markings and easily transform unused gray areas in your neighborhood into colorful and fun playgrounds, or simply make these areas more attractive and useful.

More informations on www.StreetMark.eu

EXAMPLE OF STREETMARK MARKING IMPLEMENTATION:

A high-quality asphalt base is a guarantee of high-quality installation of thermoplastic markings.

1. MAPPING

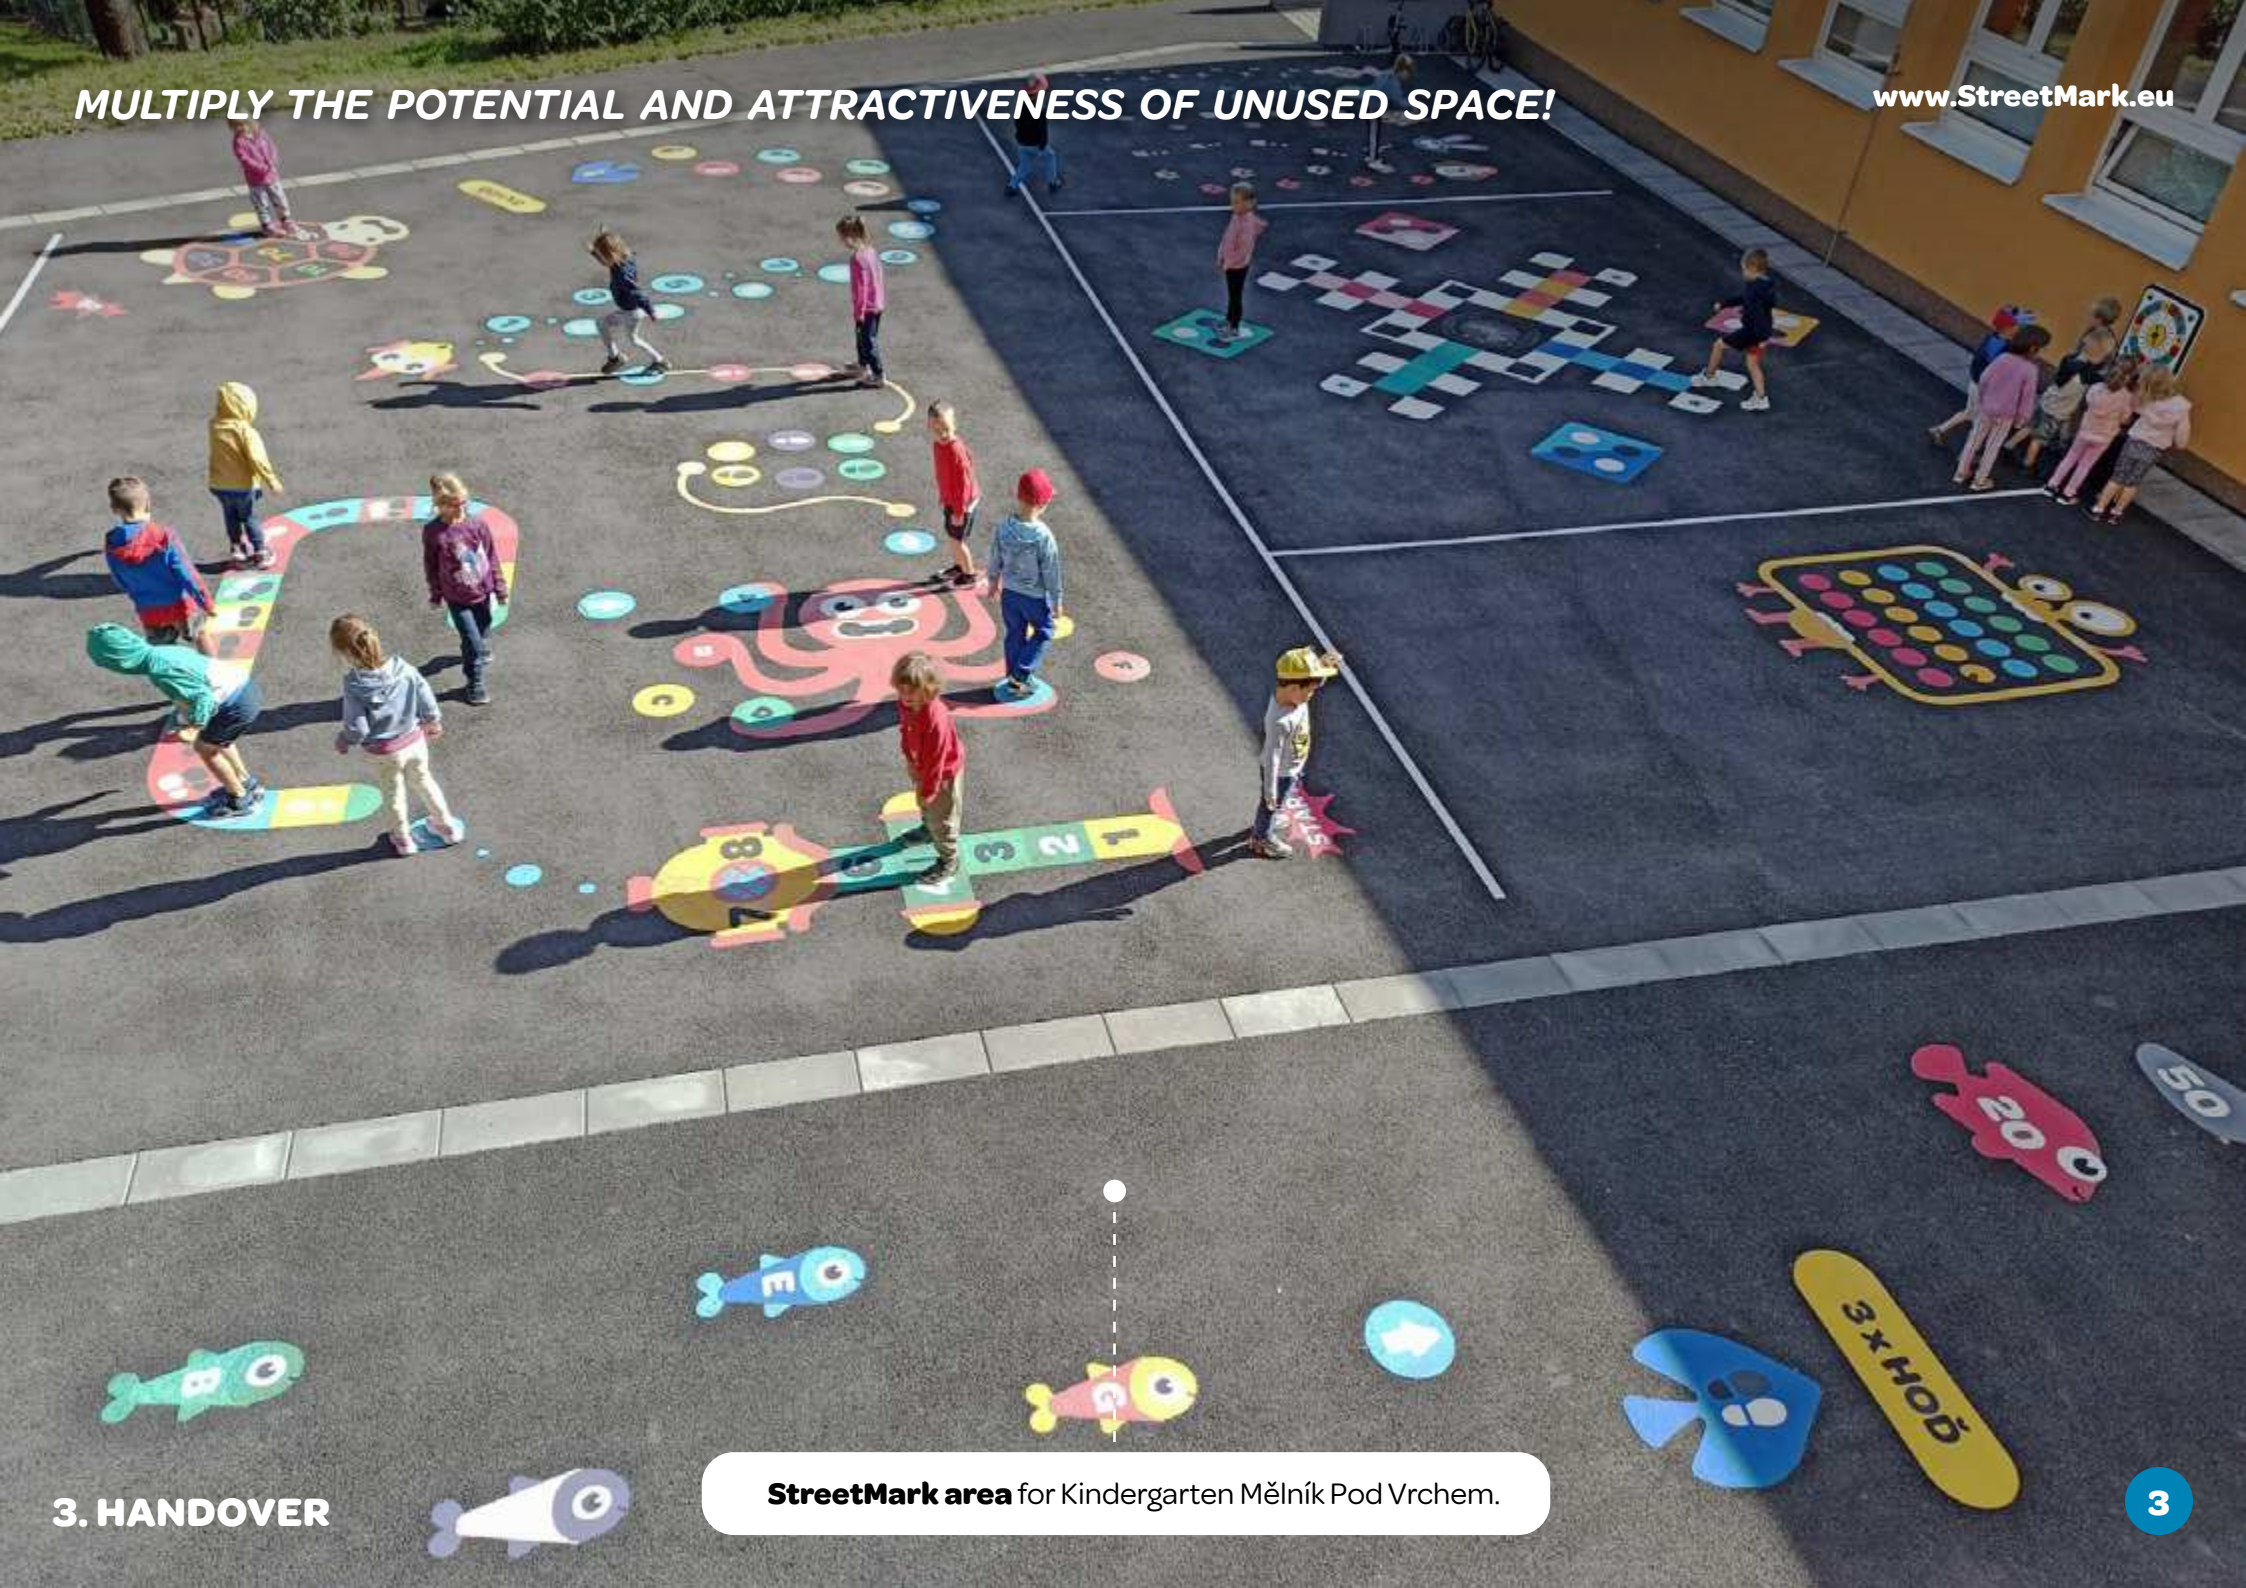

The offer also includes the creation of an individual graphic design tailored to your needs and wishes.

STREETMARK THERMOPLASTIC MARKING

In addition to playground signage, it can also be used in other areas, such as road signage, sidewalk decoration, advertising and promotion, or design modifications to various asphalt surfaces.

QUALITY AND FEATURES

All StreetMark products contain 30% glass microbeads in their mixture, which ensures high reflectivity and slip resistance throughout their entire service life.

The excellent stability of StreetMark's preformed materials is achieved through the use of unique polymers that keep them unchanged and flexible even at low temperatures, while ensuring high resistance to pressure and temperature changes.

SIMPLE APPLICATION

Thermoplastic markings are supplied in the form of prepared parts. Installation is quick and easy – simply clean the surface to remove dust and dirt, assemble the desired design, and heat the material with a gas burner.

Once heated, the marking bonds firmly to the substrate, creating a durable, resistant surface.

ECOLOGY AND SUSTAINABILITY

The pigments used in the manufacture of our StreetMark products are of organic origin.

All components also strictly comply with European environmental legislation, they are non-toxic and do not contain heavy metals such as lead.

DURABILITY AND SAFETY

Unlike paints and coatings, which fade quickly, thermoplastic material will look good and remain functional for many years.

SUITABILITY OF SURFACE FOR INSTALLING STREETMARK MARKINGS

Asphalt surface:

The quality of asphalt has a significant impact on the durability of thermoplastic markings. The better the condition of the surface, the higher the durability of the markings. Damaged or weathered asphalt, on the other hand, reduces its durability.

✓ **Suitable surface:**

New or well-preserved asphalt with an even surface and minimal cracks. Cleaned and properly prepared surfaces.

✗ **Unsuitable surface:**

Weathered asphalt with cracks or unstable structure. Surfaces contaminated with oil, grease, or other impurities.

In the case of unsuitable asphalt, its quality can be improved using special technologies, which must be assessed on a case-by-case basis.

Concrete substrate:

Application on concrete is more complicated and less durable than on asphalt. Concrete must be:

- ✓ **Completely dry, clean, and free of dust, oil, and grease.**
- ✓ **Treated with a special primer to increase adhesion.**
- ✓ **Mature, stable, without cracks or unevenness.**

If the concrete does not have the correct slope or is exposed to constant moisture, this can negatively affect the service life of the markings. It is necessary to prevent water from accumulating on the surface.

StreetMark game markings are made from the highest quality thermoplastic material.

HOPSCOTCH GAMES

“A magical world that children love”

**STREETMARK MARKING IS ENVIRONMENTALLY FRIENDLY
AND COMPLIES WITH SAFETY STANDARDS FOR CHILDREN.**

www.StreetMark.eu

A high-quality asphalt base significantly reduces the risk of damage and increases the durability of the markings.

For installation on concrete, it is necessary to ensure a dry, clean, and stable surface, use a special primer, and follow the technological application procedures.

**STREETMARK PROVIDES SAFE CROSSINGS
AND A FUN AND PLAYFUL WAY TO GET TO SCHOOL.**

www.StreetMark.eu

**We will create a logo for your school, kindergarten, municipality, club, or sponsor
and integrate it into the graphics exactly according to your wishes.**

STREETMARK EVERY DULL CYCLE PATH WILL BE BRIGHTENED UP!

Thanks to StreetMark, a sidewalk in a park, a Trail, or a quiet street can easily be transformed into a colorful and playful place.

Other possibilities of thermoplastic

StreetMark thermoplastic markings offer unlimited possibilities for color customization of outdoor asphalt surfaces, roads, and sidewalks.

SOLUTIONS FOR CITIES

Road markings, safe crossings, navigation systems, symbols, tourist signs, cycle path markings, markings for important locations.

SOLUTIONS FOR BUSINESSES

Logos and symbols in corporate identity design, advertising signage on access roads, marked parking spaces for your employees and customers.

SOLUTIONS FOR ARCHITECTS

There are no limits to your imagination. We will help you realize your ideas and visions. For example, a parking lot with the same decor as the facade of the building.

**STREETMARK PROVIDES SAFE ROUTES AND CROSSINGS
FOR YOUR CHILDREN!**

The size of the crossing can be adjusted to the width of the roadway.

HOW TO WORK WITH THE STREETMARK CATALOG www.StreetMark.eu

StreetMark has endless possibilities

**Contact us for a price offer, free graphic design,
or just an assessment of the quality of the surface for the planned installation.
Our experienced designers will help you create a custom design.**

Installation is quick and does not disrupt the operation of the site.

Approximate dimensions of game sets:

The dimensions required for play sets or other proposed games consisting of several separate elements are for guidance only. The size and shape can be adjusted according to your requirements and the possibilities of the specific area.

Modifications and customized solutions:

All sets can be customized to your preferences, other products from the catalog can be added, or completely new graphics that are not listed in the catalog can be created.

Approximate product dimensions:

The dimensions listed for individual products are approximate and may vary slightly depending on manufacturing processes.

Product code:

The product code refers to a specific product in the specified color and size. If you require a change in color or dimensions, please specify this when ordering.

Recommendations for installation:

Pay attention to the quality of the asphalt surface. We recommend installing StreetMark markings only on high-quality asphalt. The better the surface quality, the longer the durability is ensured.

**StreetMark playground
markings are made from the
highest quality, non-toxic
thermoplastic material
meeting the strictest
safety standards.**
